

NORMA  
EUROPEA

Compositi di materiali a base di cellulosa e di materiali termoplastici [comunemente chiamati compositi legno-plastica (WPC) o compositi di fibra naturale (NFC)] - Parte 1: Metodi di prova per la caratterizzazione dei compound e dei prodotti

UNI EN 15534-1

GENNAIO 2018

Composites made from cellulose-based materials and thermoplastics (usually called wood-polymer composites (WPC) or natural fibre composites (NFC)) - Part 1: Test methods for characterisation of compounds and products

La norma specifica i metodi di prova per la determinazione delle proprietà dei compositi di materiali a base di cellulosa e di materiali termoplastici, comunemente chiamati compositi legno-plastica (WPC) o compositi di fibra naturale (NFC).

In questa norma l'abbreviazione "WPC" è usata per "compositi fatti di materiali a base di cellulosa e di materiali termoplastici".

Questa parte della UNI EN 15534 è applicabile ai compound e ai prodotti cellulari o non cellulari, di materiali a base di cellulosa e di materiali termoplastici, destinati ad essere trasformati o in fase di trasformazione attraverso le tecniche di lavorazione della materie plastiche, senza soglia per il contenuto di materiale a base di cellulosa.

Per una data applicazione non sono necessariamente valutate tutte le proprietà elencate in questa parte della UNI EN 15534.

I parametri di prova e i requisiti dei metodi di prova per una data applicazione, sono specificati nella corrispondente parte della UNI EN 15534.

TESTO INGLESE

La presente norma è la versione ufficiale in lingua inglese della norma europea EN 15534-1:2014+A1 (edizione novembre 2017).

La presente norma sostituisce la UNI EN 15534-1:2014

ICS 79.080; 83.080.01; 83.140.99
